

SOLTERRA CAPE / WEST COAST OFFER A BROAD RANGE OF SUSTAINABLE “GREEN” SOLUTIONS.

Energy Audits

Solar Power Systems

Solar Water Geysers

Lighting

Heat Pumps

SOLTERRA ENERGY AUDITS

Solterra CAPE / WEST COAST offer energy audits to customers looking to understand their energy consumption patterns and how to ultimately save on energy costs. Through an energy audit, energy hungry appliances and poor energy behaviour patterns can be identified and corrected. Energy audits not only identify savings for clients they also assist in building a Solar Solution which is truly customised to the client's energy demands and prevent building oversized systems.

SOLTERRA SOLAR POWER SOLUTIONS

Solterra CAPE / WEST COAST range of solar power solutions will enable you to have the most energy efficient and cost effective home, or commercial, solar power system. We achieve this through combining best in class products, with some of the leading minds in the industry. We also pride ourselves on using premium components which are imported from leaders in the solar energy field including SMA Solar Technology (Germany), Victron Energy (Holland), Sunlight (Greece) and Canadian Solar.

We believe in designing sustainable solutions that will meet YOUR needs and requirements, including:

- Cost saving
- Back up power, or
- Complete energy independence.

Plus remote access technology enables you to monitor, manage and service your system – giving you peace of mind, increased efficiencies and cost-saving on unnecessary call-out fees.

The opportunities and solutions are endless and because each and every system we design is purpose built for our clients, you will always get the result you were looking for

SOLTERRA SOLAR WATER GEYSERS

Solterra CAPE / WEST COAST offer a variety of solar geyser options – including the best of both local and international brands.

Our choice of solar geysers will give you:

- Energy efficiencies – Save on average 40% on electricity every month
- Consistent HOT water
- Longer warranties and minimum service requirements
- Peace of mind – Products are SABS approved, aesthetically pleasing, and suitable for all roof types.

SOLTERRA LIGHTING

LED or Light Emitting Diodes are solid state lights, and offer low energy lighting. This technology has many advantages over the lighting you are most likely utilising in your home or business currently, including:

- It is mercury free
- It does not flicker
- It offers a full spectrum light which is the closest you can get to natural light.

However, the main advantage is that to your pocket! LED's use a fraction of the power of conventional lighting; yet still offer you a superior quality of light. You use 70% less power with a complete swap out and therefore can save 70% on the cost of lighting in your home or business.

SOLTERRA HEAT PUMPS

Solterra CAPE / WEST COAST offers a broad range of heat pump technology including solutions that cover residential and commercial applications as well as swimming pool heating applications.

Benefits include:

- Saving two-thirds of your water heating costs every day
- Heats day or night – rain or shine
- No panels on roof or exposed glass to break
- Eco-Friendly, easy to install and remote-controlled.

OUR TEAM

We are a national network of owner managed franchises, Solterra CAPE / WEST COAST is guided and managed through a head office. Thus ensuring peace of mind for you the consumer. We have put together an exceptional team of experienced experts to lead and guide our network. Taking care of everything from network expansion, supply chain, engineering, projects, energy efficiency and gain share models right through to installation.

Consulting beforehand & communicating with our clients throughout the entire TURNKEY PROJECT is critical to a smooth and hassle free end result.
